

Innova Cloud Assessment and Governance Framework

Take Control of Your Cloud Environment

The Cloud is Transformative, But Are You Truly in Control?

Cloud transforms how businesses operate, offering unmatched scalability and agility. Despite this, many organizations struggle to harness its full potential due to a lack of proper cloud governance. Recent reports reveal a concerning reality:

 Limited Visibility	 Security Challenges	 Manual Burden
<p>Only 23% of organizations have a complete view of their cloud landscape, leaving them vulnerable to hidden costs.</p>	<p>61% rely on a patchwork of security tools, creating complexity and hindering their ability to effectively manage and respond to threats.</p>	<p>75% of security teams are bogged down by manual tasks, hindering their ability to focus on strategic initiatives and proactive security measures.</p>

By taking a comprehensive approach to cloud governance, organizations can mitigate risks. The Well-Architected Framework based assessment helps achieve this by providing a structured evaluation of your cloud architecture.

Well-Architected Assessment

The Well-Architected Framework Assessment goes beyond a technical review, fostering a culture of continuous improvement in cloud environments. It ensures regular evaluation and optimization of workloads and architectures to align with evolving business needs, new cloud services, and best practices. The assessment establishes integrated and ongoing governance across an organization’s cloud infrastructure.

Benefits of Innova’s Well-Architected Framework

Efficiency Through Innovation

Innova's tool-based well-architected assessment boosts assessment efficiency by **50%** and improves coverage by **40%**, setting a new industry benchmark for cloud governance.

Hyperscaler Frameworks	Custom Frameworks Tailored for Your Needs	Unified Multi-cloud Management	Industry Compliance as Standard	Domain Expertise at Core
Tailored frameworks for each hyperscaler (AWS, GCP, and Azure) to ensure consistent performance for your workloads, regardless of whether they run in a single cloud, hybrid cloud, or multi-cloud environment.	Innova assessments are designed to be flexible and adaptable, seamlessly integrating frameworks that cater to your specific needs.	Experience a cohesive assessment process across all cloud platforms, facilitated by our all-encompassing tool and dashboard.	Align with top industry standards (CIS Benchmarks, FedRAMP, GDPR, HIPAA, ISO Certifications, NIST, PCI DSS, SOC2), fortifying your business's security posture and readiness for success.	Leverage our deep expertise in Healthcare, Life Sciences, Manufacturing, Financial Services, and Technology sectors and harness cloud technologies for unrivaled scale and speed.

Navigate the Cloud with Confidence

Regardless of your stage in the cloud journey or the complexity of your systems, prioritizing regular cloud assessments and establishing a robust managed services practice—encompassing people, processes, and tools—is crucial for a healthy and optimized cloud environment. Discover how Innova Assessments can empower you to navigate the cloud with confidence.
