

Rajendra (Raj) Sadhu

Senior Vice President, Hi-Tech SBU

Raj Sadhu is the Senior Vice President, Hi-Tech SBU at Innova Solutions. Besides overseeing innovation across the organization, he heads Hi-Tech vertical where he brings innovation and cutting-edge technology to Innova Hi-Tech clients.

Previously, Raj was the CEO and VP of Technology of VESAG Health Inc., a leading provider of mobile and electronic communication products and services. During his long career in the wireless and medical industries, he pioneered the concept of IoT, wearable mobile health technology.

For over a decade, he has worked for reputed companies such as IBM Global Services, US Steel, and Verizon Wireless. And has served as the CEO of Bay Digital Foreign Operations, where he used to handle the US, European, and South American markets.

His entrepreneurial spirit compelled him to found Rated One Inc., an innovative people corporation. In later years, he established VESAG Health Inc., a multifaceted business group that developed innovative products for modern consumers. He is the inventor of the first medical smartwatch and holds multiple patents on connected cars, smartwatches, and IoT technology.

Large corporations successfully commercialized Raj's intellectual property and created many wearable wireless technology products that are currently in use. A passionate innovator, he is interested in wireless technologies, global business, research, and development.

As an inspiring speaker, Raj has spoken at many conferences worldwide and received distinguished awards, including the Albert Einstein Innovation Award, Amazing Indian Incredible Innovator, and a Gold Medal from the Government of India.

He is passionate about advanced wire/wireless networks, wireless protocols and applications, wearable technology, product innovation, and medical devices.
