PAYMENT HUB
Transforming Payment Operations Across Industries

aws
PARTNER
Advanced Tier
Services

Reimagining Payments: Unified | Automated | Intelligent.

Payment Hub by Innova Solutions is a **cloud-native platform** that unifies and automates payment processes for **healthcare payers, financial institutions, fintechs, and claims processors.**
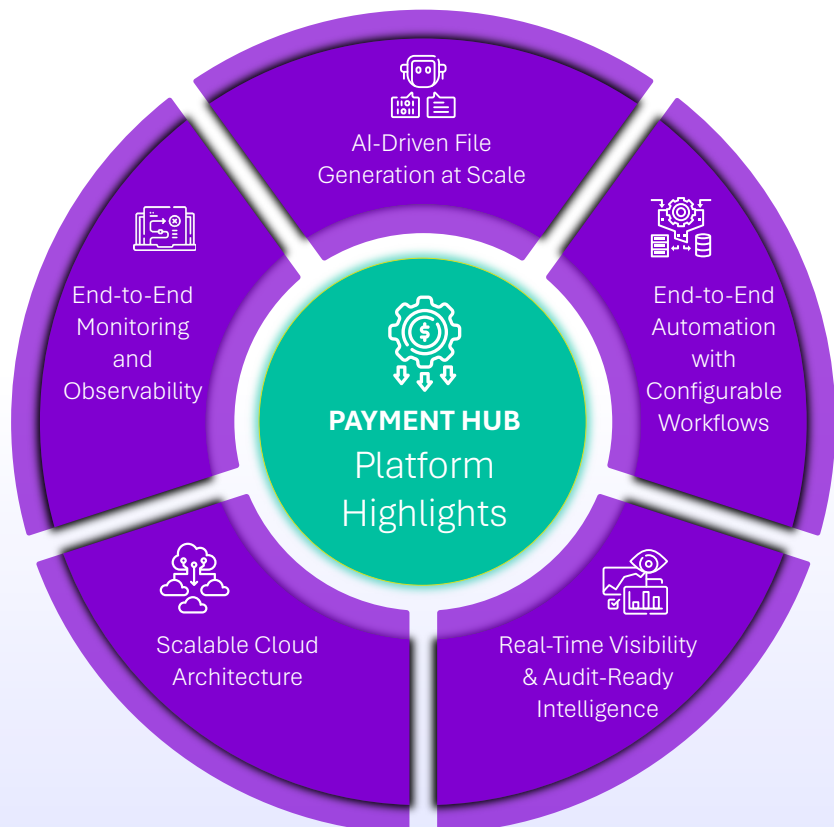

Built on **the scalable and secure AWS infrastructure,** the platform replaces fragmented, manual workflows with an **intelligent, centralized system** that automates **EFT/check processing, EDI 835 generation, reconciliation, and secure partner exchanges.**

Payment Hub's API-driven portal architecture on AWS ensures that all the functions—from integration and automation to monitoring and control—are managed through a unified, intuitive user interface.

With its **AI-driven insights, modular architecture,** and **AWS-native services**, Payment Hub helps transform traditional, siloed payment systems into a m**odern, intelligent, and modular ecosystem**, enabling organizations to achieve **real-time visibility** and ensure **audit-ready compliance** throughout the entire payment lifecycle.

Business Benefits

✅ **AI-Powered Automation:**
Reducing manual effort, boosting accuracy, and accelerating cycle times

✅ **Accelerated Payment Lifecycle:**
Streamlining approvals, validations, and remittance generation.

✅ **Real-Time Visibility:**
Delivering dashboards and alerts for operational intelligence.

✅ **Audit-Ready Compliance:**
Ensuring traceable logs, rules-based validation, and built-in governance.

✅ **Scalable & Secure Architecture:**
Leveraging AWS-native design for high performance and compliance.

✅ **Data-Driven Insights:**
Unlocking predictive intelligence and operational KPIs through embedded analytics

PAYMENT HUB
Platform Highlights

- AI-Driven File Generation at Scale
- End-to-End Automation with Configurable Workflows
- Real-Time Visibility & Audit-Ready Intelligence
- Scalable Cloud Architecture
- End-to-End Monitoring and Observability

Real-World Use Cases

Healthcare Payers & TPAs:
Automating claims payments, remittance advice, and reconciliation

Financial Institutions & Fintechs:
Managing ACH, virtual card, and digital wallet payments

Claims & Settlement Platforms:
Streamlining disbursements and reporting

Revenue Cycle & Billing Providers:
Reducing cycle time and enhancing payment visibility

Clearinghouses & Partner Networks:
Enabling secure, interoperable exchanges

Key AWS Components

Amazon S3	**AWS Glue**	**AWS Bedrock**	**Amazon EventBridge**	**Amazon CloudWatch**
Secure, scalable storage for payment data and transaction logs	ETL and data integration for transforming payment data	Foundation models for AI-driven insights and intelligent automation in payment workflows	Event-driven architecture for real-time payment workflows	Monitoring and observability with logs, metrics, and traces

Reimagine payments—transform your operations with Payment Hub powered by AWS AI.
